Research and Applications of Machine Translation: Personal Experience

Qun Liu

11-10-2017 at UCAS

Personal Research History in MT

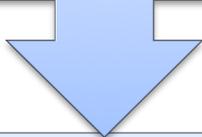

Selected MT Application Projects

Thoughts and Perspectives

1990-2002: Rule-based Period

2003-2014: Statistical Period

2015-present: Neural Period

- 1990-1992: “863” IMT Project
- 1993-2002: TransEasy
 - 1993-1994: Design
 - 1994-1996: Implementation
 - 1994: Collaboration with PKU
 - 1996: “863” Evaluation
 - 1997-2001: Improvement
 - 2002: NIST Evaluation
 - Open Source: NanGe
- 2002: Word Similarity Computing based on How-Net

- Chinese Segmentation
 - ICTCLAS (2002-2003)
- Word Alignment
 - Log-linear models for word alignment (2005)
 - Discriminative word alignment (2009)
- Syntax-based SMT
 - Tree-to-String SMT (2006)
 - ME-BTG SMT (2006)
 - Forest-based SMT (2008)
 - Context-Aware Rule Selection for SMT (2008)
 - Dependency-to-String SMT (2011-2013)
 - Graph-based MT (2015-2017)
- Human-machine Interaction for SMT
 - TM-SMT Combination (2015-2016)
 - Quality Estimation (2015-2017)
- MT Evaluation
 - Syntax-based MT Metrics (2014)
 - Combined MT Metrics (2016-2017)

- Human-machine Interaction for NMT
 - Constrained Decoding for NMT (2017)
- Multi-model MT
 - Image-enhanced NMT (2017)
- Morphologically Rich Language MT
 - Subword Segmentation for NMT (2017)
 - Subword level Neural Language Model (2017)
- Improved NMT
 - Interactive Attention for Neural Machine Translation
- Discourse Translation
 - Dropped Pronoun Translation (2015)
 - Dialog Translation (2016)
- Domain Adaptation for MT
 - Domain Adaptation with Topic Model (2016)
 - Domain Adaptation with Gated NN (2016)
